

## Important Dates To Remember

March 15 – April 27

Partial Closure of Parking  
Lot 4  
East Alisal St. Lot

March 22—April 27

Partial Closure of Parking  
Lot 3  
Homestead Ave. Lot

April 15

Partial Closure of Parking  
Lot 1  
West Central St. Lot

May 1

Partial Closure of Parking  
Lot 2  
East Central St. Lot

May 18

Ground Breaking Party  
Everyone welcome

June 1

Complete closure of Parking  
Lots 1 & 2 until the  
construction is finished

## Meeting The Needs of the Future

The support of the Hartnell community was reinforced in November of 2002 when Measure H (\$131 million bond) was passed. The passage of this bond will allow Hartnell College to meet the needs of future students. Hartnell, in its current room configuration will support 6,500 students. Hartnell is currently at 10,000 students and classes are meeting in every nook, cranny and portable classroom available. By 2012, Hartnell expects to be at 12-16,000 students and the passage of Measure H allows us to build to meet this community's future needs.

The passage of this bond allows Hartnell to leverage construction costs against state construction funds. In some cases, Hartnell will be able to match funding at a 60/40 rate. With funds already secured this bond, Hartnell will have the buying power of an additional \$60 million further increasing the college's ability to meet student needs.

In order of construction Hartnell will build:

- The Learning Resource Center (2004-06),
- Parking Garage (2004-06),
- Center for Assessment & Lifelong Learning (2006-08),
- Classroom buildings at East Campus (2006-09)
- And a second instructional building (2008-11) on the main campus.

From 2004-06 Hartnell will replace an aging infrastructure that was first put in place in the 1950's and then added to in a patchwork pattern.

From 2003-12 Hartnell will renovate all of the rest of the buildings on campus to better meet Americans with Disabilities Act requirements; to design classrooms that fit student and instructor needs; and to upgrade, replace, and

Architectural Rendering of The Learning Resource Center

develop those technological needs required by our community.

The first structure to be built is illustrated in the above architect's concept drawing of the Learning Resource Center. This building will be constructed at the corner of Central and Homestead. The Learning Resource Center will house the new library stacks, special collections, open computer laboratories for student research, and rooms for community meetings.

The second structure will be a three story parking garage situated over the current central parking. This will allow Hartnell to replace the spaces lost due to the addition of the Learning Resource Center and add to the parking available on campus.

The Center for Assessment and Lifelong Learning will be the third structure constructed on the Homestead next to the College Center. This building will be dedicated to help students access their college goals. Areas of this building will be set aside for academic skills development some of which will be **Math Center** where students can receive help with their

math courses, the **Reading Center** where students can receive help with their English courses, and the **Learning Skills Center** where students can receive help with their college student skills.

**This is an exciting time for Hartnell and our community. To be allowed to completely rebuild the face of our educational facilities is inspiring and daunting. There will be inconveniences when you come on campus, but we will endeavor to minimize them.**

### *Save The Date*

Please come and enjoy our Ground Breaking on *May 18 th*

Again, thank you for your continued support of Hartnell College.
