

# Winter 2021 Math Academy

# General Information

---

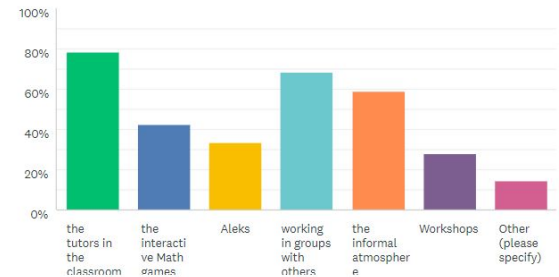

- Our goal for Math Academy is to provide you with opportunities to work in small groups in a welcoming and supportive learning environment
- The Winter 2021 Online Math Academy will be offered in the evening.
  - *We are going to pilot this new structure to accommodate our working students. Our goal will be to offer a day and evening option in summer 2021, but we will pilot the new structure this winter to help us prepare for summer 2021.*

# Online Summer 20 Math Academy Feedback

- I will take away effective strategies for studying, and I learned how to deeply think about math. I wouldn't say I ever hated math because of times of frustration, but this has made math easier.
- A take away from my experience would be how there are many people ready to help and show you step by step process
- the workshops helped a lot on my anxiety for this coming semester. The pomodoro technique, the different techniques for notes taking.
- I appreciated how the instructors and tutors shared their journey with math and how it wasn't as perfect as we would think, which makes them much more understanding of each individual's journey with math

What did you like MOST about the Math Academy program (select all that apply)?
