Hi everyone,

Tomorrow, Friday, is the first day of priority registration. A few updates below:

- Med Proctor is now working. Students can log in via DUO to upload their proof of vaccination/exemption
- Orientation link will be accessible via DUO soon.
- To be able to register, students must reset their password and enroll in single sign-on with DUO.
- Password reset help available in the Panther Learning Lab upstairs M-F 9am - 5pm
- A&R will no longer reset passwords.

Attached is the communication that will be sent to all priority registration groups to inform them of priority registration as well as notifying them to reset their password.

Students can check their priority registration date on their PAWS Self Serve.

I've also updated the registration website with instructions on how to register via PAWS Self Serve. I'm also going to add a video (waiting for the link). Feel free to send the [registration](#) link to students.

Once again, if you have students asking about the password reset and DUO, please help them, direct them to the password reset [website](#) or to the help lab.
