V. Policy updates: AB 928

On or before December 31, 2023, the committee shall provide the Legislature with recommendations on all of the following issues impeding the scaling of the ADT and streamlining transfer across segments for students: (listing only the one impacting our curriculum)

Proposing a new unit threshold for STEM degree pathways that meet the requirements for admission to the California State University and the University of California.

On or before December 31, 2024, the committee shall achieve all of the following: (listing only the one impacting our curriculum)

Establish timelines and reporting deadlines for the existing regular review of declaring or matching transfer model curricula similar to the California State University majors for admissions purposes. In doing this, the committee shall develop a plan to establish reporting and accountability requirements to ensure that transfer model curricula are aligned with the ADT.

Develop a plan for the periodic analysis and creation of additional transfer model curricula for the ADT to respond to evolving workforce demands, including STEM degree pathways, and degree pathways that will aid in the economic recovery

from the COVID-19 pandemic, such as nursing and cybersecurity. The plan shall establish venues for professional collaboration in consultation with academic senates and appropriate discipline faculty on degree production, major alignment, and workforce- or industry-specific relevance.

On or before May 31, 2023, the Intersegmental Committee of the Academic Senates of the University of California, the California State University, and the California Community Colleges shall establish a **singular lower division general education pathway** that meets the academic requirements necessary for transfer admission to both the California State University and University of California. If the Intersegmental Committee of the Academic Senates of the University of California, the California State University, and the California Community Colleges is unable to come to agreement on or before May 31, 2023, the respective administrative bodies of those segments shall establish a singular lower division general education pathway that meets the academic requirements necessary for transfer admission to the California State University and the University of California by December 31, 2023.

Commencing with the fall term of the 2025–26 academic year, the singular lower division general education pathway established pursuant to paragraph (1) shall be the only lower division general education pathway used to determine academic eligibility and sufficient academic preparation for transfer admission to the California State University and the University of California.

On or before August 1, 2024, where ADTs for major pathways exist, the California Community Colleges shall place students on the ADT pathway if students declare a goal of transfer on their mandatory education plans and such a pathway exists for their intended major.

A student may opt out of the ADT pathway for a local associate degree if the student plans to apply to transfer to a University of California campus or an independent institution of higher education. Each community college shall use their existing processes for student education plans to implement the opt out feature where an ADT exists.

VI. Call for Future Agenda Items to Consider

VII. Adjournment (next meeting date, February 3, 2022)
