

Safety Committee Recommendations to IRC

- Safety Committee recommends that the parking enforcement hours be extended from Monday through Friday, 8 am to 8 pm, to be changed to Monday through SATURDAY, 7 am-8 pm. Since this will be a change to the existing parking regulations, according to the regulations, the President would need to approve any amendments. If this passes, we will need to update the parking signs district-wide, and this may present an opportunity to adjust the verbiage and presentation surrounding the no backing-in policy. Additionally, Spanish translation on the signs was suggested by the committee. Graciano and Joseph have been made aware.
- Safety Committee wants to make amendments to the existing membership structure for the Safety Committee. The committee voted and agreed on adding a permanent position for a representative from the Communications Office and to amend the 3 faculty representatives, specifically the nursing faculty representative, to consider a CSEA representative to fill that position if no nursing faculty representative is available.
