Majors
Exploring fields of study and related careers

Read the following reference guide to find out more about majors, degree options at Hartnell College, related skills and related careers.

For specific major course requirements, please consult the Hartnell College Catalog.
Administration of Justice

Overview

The Administration of Justice program includes the theory and practice of law enforcement, correctional science and paralegal/legal assistantship. Law enforcement courses focus on police activities including effective patrol services to the public. Correctional science courses instruct on the incarceration process as well as rehabilitation of the offender. Paralegal/legal assistantship courses overview the preparation of cases for court under the supervision of an attorney. Students will be exposed to the core principles and practices in the field of Administration of Justice. This includes a strong foundation in the theory and practice of law enforcement and law enforcement investigation, the origin and application of criminal law, the various components of the criminal justice system, the structure of the various court systems, and trial process.

Degree Options at Hartnell:

- Associate in Science in Administration of Justice for Transfer Degree
- Associate of Science in Administration of Justice

Related Careers

- Police Officer
- Deputy Sheriff
- Correctional Officer
- Probation Officer
- Parole Agent
- Paralegal
- Law Enforcement Agent
- Criminal Investigator
- Detective
- Attorney
- Military Officer
- Public Defender
- Social Worker
- Warden

Related Skills

- Identify and analyze social problems
- Broad understanding of law
- Considerations of gender & race
- Critical thinking
- Decision-making
- Ethics and moral values
- Interviewing skills
- Knowledge of legal structures
- Patience
- Quantitative skills
- Research strategies
- Supervision & management skills
- Understanding nature of crimes
- Understanding society’s reaction to crimes
- Written & presentation skills
The Advanced Diesel Technology program is designed to provide students with the skills and knowledge required to succeed as technicians in the field of heavy-duty diesel equipment, transportation and agriculture industries, or related industries. The curriculum provides both theoretical and hands-on learning experiences that provide students with the opportunity to apply the learned skills in a variety of different areas, such as transportation, and agriculture equipment to name only two. Diagnosis and repair procedures performed on heavy-duty diesel equipment enable students to develop the skills required for placement in the heavy duty diesel technology industry.

Degree Options at Hartnell:

Associate of Science Degree in Advanced Diesel Technology

Overview

Related Careers

- Bus and Truck Mechanic
- Diesel Engine Specialist
- Diesel Service Technician
- Automotive Service Technician and Mechanic
- Retail Service Technician
- Industrial Repair
- Locomotive Service and Repair
- Specialty Shop Technician
- Engine Builder
- Shop Manger
- Parts Manager

Related Skills

- Customer service skills
- Dexterity
- Mechanical skills
- Troubleshooting skills
- Public safety and security
- Repairing
- Operation and control
- Operation monitoring
- Quality control analysis
- Critical thinking
- Equipment maintenance
Courses in these areas provide students with skills valuable to businesses in the Central Coast’s produce industry or with one of the many companies providing support services and products. Many of the courses are fully transferable to the California State University system. Internships and work experience are an important part of the program, providing students with experience and contacts in the local produce industry. Many local employees started their career paths in the agriculture program at Hartnell College. The hands-on, practical approach helps students to find opportunities in a wide range of industry positions.

Overview

Related Careers
- Product Manager
- Quality Control Supervisor
- Produce Sales
- Supplies and Services Sales
- Labor Contractor
- Pest Control Advisor
- Field Production Supervisor
- Harvest Supervisor
- Production Specialist
- Produce Buyer
- Owner-Grower

Related Skills
- Problem-solving techniques
- Critical thinking skills
- Preparation and delivery of business documents
- Quality control analysis
- Operation monitoring
- Production and processing
- Management of personnel resources
The Alcohol and Drug Abuse Counseling major prepares individuals to help prevent substance abuse, counsel individuals and families with drug and alcohol problems, and perform intervention and therapeutic services for persons suffering from addiction. The major includes instruction in individual and group counseling skills, psychology of addiction, sociology, crisis intervention, substance abuse identification methodologies, substance abuse treatment modalities, substance abuse prevention and treatment resources, pharmacology and behavioral aspects of abused substances, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, treatment evaluation, patient observation and education, group dynamics, and applicable law and regulations.¹

Degree Options at Hartnell:

Associate of Arts Degree in Alcohol & Drug Abuse Counseling

Certificate of Achievement in Alcohol & Drug Abuse Counseling

Related Careers

- Substance Abuse Counselor in residential treatment programs, pre-treatment, inpatient, outpatient and aftercare programs
- Mental Health Counselor
- Social Worker
- Community Prevention & Education Counselor
- Therapist
- Probation Officer

Related Skills

- Active listening
- Good communication skills
- Social perceptiveness and sensitivity
- Critical thinking
- Monitoring and assessing performance of self and others
- Treatment planning and coordination
- Collaboration
- Service orientation

The Astronomy program introduces students to physical properties and processes that govern celestial bodies in the Universe. Students may take astronomy courses to satisfy their natural sciences requirements or to transfer with a major in astronomy or double major in astronomy and physics to the university.

Students who pursue a B.S. degree in astronomy will be qualified to enter a teaching credential program, operate a planetarium, and assist at an observatory. With an M.S. degree, students can teach astronomy or physics at a community college, be a telescope operator at a major observatory, or work in industry. A Ph.D. qualifies students for a career in research at a university, space agency, or observatory.

Degree Options at Hartnell:

**Associate of Science Degree in Astronomy**

**Overview**

**Related Careers**

- Astronomer
- Natural Science Manager
- Science Teacher
- Observatory Director
- Research Scientist
- Astronomy/Physics Professor
- Astrophysicist

**Related Skills**

- Using scientific rules and methods
- Critical thinking
- Reading comprehension
- Active learning and problem solving
- Written and verbal communication
- Mathematics
Automotive mechanics prepares individuals to apply technical knowledge and skills to repair, service, and maintain all types of automobiles. Includes instruction in brake systems, electrical systems, engine performance, engine repair, suspension and steering, automatic and manual transmissions and drive trains, and heating and air condition systems.¹ This certificate or degree program prepares students for entry-level employment as automotive service and repair technicians. Basic automotive maintenance and service operations are stressed to allow students to be immediately productive on the job. This program prepares students for employment in automotive servicing and repair, engine testing, automotive field services, and automotive parts. A long-sleeve work shirt, safety glasses, pants, and work boots are required dress in all AUT classes for safety reasons.

- Repairing
- Troubleshooting
- Quality control analysis
- Equipment selection
- Operation and control
- Operation monitoring
Biology is the study of life, individual organisms, their communities, and the systems, cells, and processes that make up living matter. The Biology program offers courses that are intended to create interest and enrichment through the study of living organisms and the basic biological principles. The major courses provide a strong background in the biological sciences for students transferring to four-year institutions who are interested in careers such as agriculture, health, research, and teaching.

Degree Options at Hartnell:
Associate of Science Degree in Biology
Associate of Science for Transfer Degree in Biology (AS-T)

Overview

Related Careers
- Biologist
- Animal Scientist
- Botanist
- Ecologist
- Environmental Scientist
- Natural Resource Manager

Degree Options at Hartnell:

Associate in Science in Business Administration for Transfer Degree (AS-T)

Overview

The business administration major generally prepares individuals to plan, organize, direct, and control the functions and processes of a firm or organization. Includes instruction in management theory, human resources management and behavior, accounting and other quantitative methods, purchasing and logistics, organization and production, marketing, and business decision-making.¹ The Associate in Science in Business Administration for Transfer degree aligns with the CSU Bachelor of Science in Business Administration. The Associate in Science in Business Administration for Transfer degree is designed to provide students with the common core of lower division courses required to transfer and pursue a baccalaureate degree in Business Administration. This includes four-year business degrees with options such as accounting, finance, human resources management, international business, management, operations management, and marketing.

Related Careers

- Chief Executive

- Computers and electronics
- Service orientation
Overview

A program of study that focuses on the scientific study of the composition and behavior of matter, including its micro and macro structure, the processes of chemical change, and the theoretical description and laboratory simulation of these phenomena.¹ A full program of chemistry for the professional scientist is offered through general chemistry and a two-semester course in organic chemistry. A separate track is offered for nursing students which includes general inorganic, organic and biochemistry. The Chemistry discipline also has a strong commitment to the student with no prior chemistry or one whose background is weak. The entire program is taught with a strong emphasis on the laboratory and in the more advanced classes, students receive hands-on experience with a wide variety of instruments.

Related Careers

- Research and analysis
- Understanding people and institutions in different communities and cultures
- Oral and written communication
- Proficiency in interpersonal communication
- Thorough knowledge of community resources
- Ability to interact effectively with people of different backgrounds
Communication Studies

Overview

Communication Studies allows students to focus their major course work and required electives to meet the needs of business, interpersonal, and public communication; and to demonstrate communicative competence. A degree in Communication Studies can lead to a career (or further study) in public relations, teaching, consulting, broadcasting, law ministry, public administration or any field in which communication skills are highly valued. Upon successful completion of the major a student should be able to: conceive, develop and deliver a focused, cogent, and clear presentation; explain the transactional and transformative nature of human communication; and research, organize and write a paper concerning the development, implementation, and effective use of various communication theories.

Degree Options at Hartnell:

Associate in Arts in Communication Studies for Transfer Degree (AA-T)

Computer Science and Information Systems, Computer Science Option

Overview

The Computer Science and Information Systems program prepares students taking the Computer Science Option with the lower-division coursework required at most universities for advancement to upper-division coursework for the Bachelor’s Degree with a major in Computer Science or Information Systems fields. All options are designed to provide students with the skills necessary for employment in the information systems and computer science industry. This certificate or degree program is designed for those interested in becoming programmers in a technical, scientific systems or game development environment, or for students desiring transfer to a four-year Computer Science Degree Program.

Degree Options at Hartnell:
Associate of Science Degree in Computer Science and Information Systems, Computer Science Option or Network and Security Option
Certificate of Achievement: Computer Science and Information Systems, Computer Science Option or Network and Security Option

Related Careers
- Computer & Information System Managers
- Information Security Analysts
- Software Developers
- Software Quality Assurance Engineers & Testers
- Computer Science Teacher
- Computer Programmer
- Computer Network Support Specialist
- Computer Systems Engineer
- Web Administrator

The Associate of Science Degree in Construction Management and Architecture provides a comprehensive introduction to the construction management profession and professional architectural studies. Students select an Associate of Science Degree emphasis in either Construction Management or Architecture, which share interdisciplinary core courses. Licensed professionals instruct students in principles of sustainability, fundamental construction field skills and methods, construction management principles, and architectural design theory. Under practical field and professional studio conditions, students apply current, leading-industry construction techniques, and computer-aided design and management technologies.

Degree Options at Hartnell:
- Associate of Science Degree in Construction Management
- Certificate of Achievement:
  - Construction Management
  - Green Building
  - Sustainable Design

Overview

Related Careers
- Construction Manager
- First Line Supervisor of Construction Trade and Extraction Worker
- Sustainable Building Designer
- Green Building Specialist
- Auditor
- Commissioner
- Inspector

The Early Childhood Education (ECE) program offers a comprehensive course of study to prepare students for career and job opportunities in early education and care of young children from diverse family backgrounds. The program includes instruction in parent education as well as preparation for employment in child development centers, family child-care settings, preschools, before- and after-school care programs, programs for children with special needs, and other ECE related-programs in the community. The ECE curriculum provides coursework with specializations in administration of ECE programs, infant/toddler development and care, advanced ECE curriculum, and special needs. Students will be eligible to meet Department of Social and Employment Services Title 22 and Education Code Title 5 licensing regulations for teaching personnel and administrative staff in private and public child development programs and agencies.

Degree Options at Hartnell:

Associate of Arts in Economics for Transfer Degree (AA-T)

Overview

This degree provides the lower division economics major courses required at many CSUs while exposing students to the core principles of the economics field. Economics is the study of how people choose to use scarce resources to produce goods and services and how they make allocation decisions to satisfy their wants and needs. In pursuing the Associate in Arts in Economics for Transfer degree, students acquire skills to analyze problems and then to use sound reasoning to make decisions. Students majoring in economics develop critical thinking, problem solving, and communication skills. As economic majors, students have learning opportunities that are relevant to many types of careers, including economists, public policy, government agencies and government related organizations (for example, the Federal Reserve System and the Bureau of Labor Statistics), business, finance, data analysis, accounting and education. For detailed requirements for individual four-year institutions, students should contact the transfer institution and meet with a counselor for specific transfer course requirements in their major.

The A.A. Degree in Elementary Teacher Education is intended for students who plan to complete a bachelor’s degree at a transfer institution in preparation for a California Multiple Subject Teaching Credential. Most students pursue this credential with the goal of becoming an elementary school or special education teacher. Upon successful completion of the Associate in Arts in Elementary Teacher Education for Transfer Degree, a student should be able to: clarify and articulate career goals of becoming a teacher, demonstrate a basic grasp of the disciplines most commonly taught in elementary schools in California, including physical science, biology, art, and literature in a cultural or geographic context, world geography, United States history, and United States government; and transfer into the traditional Liberal Studies major.

Degree Options at Hartnell:

Associate of Science Degree in Engineering

Overview

Engineering is the practical application of math and science to solve problems. Engineers are problem-solvers who make things work faster, cheaper, and more efficiently. Technologies developed by engineers improve the ways that we live, communicate, work, travel, stay healthy, and entertain ourselves. From computer chips to cellphones and buildings to automobiles, engineering makes every aspect of our modern life possible. Hartnell College offers a two-year lower division engineering program that prepares students for transfer in all engineering disciplines to colleges and universities in California and across the United States. The first two years of the engineering curriculum at most colleges and universities have a shared core of mathematics and physics, with specialization in several areas. As there are different disciplines within engineering, the Engineering Faculty Discipline Review Group (FDRG) has developed four different model curricula and each one feeds into one or more majors at the baccalaureate level. The four discipline clusters are: 1. Mechanical, Aerospace, and Manufacturing Engineering 2. Civil Engineering 3. Electrical Engineering 4. Computer and Software Engineering. The required core curriculum follows the Engineering Articulation Agreement developed by the Engineering Liaison Council (ELC) between community colleges and four-year public and private colleges and universities.

The study of English as a major discipline is composed of two different areas of concentration: literature and composition and writing. Literature explores the fiction, drama, and poetry of different cultures. It involves criticism of the literature being studied. Composition and writing deals with the mechanics of language, the structure of compositions, grammar, rhetoric (theory behind the composition), and creative writing. Courses in these areas deal not only with subjects but how to teach them.¹ The Associate in Arts in English for Transfer offers a study of composition, language, and literature designed to develop skills in reading perceptively, writing effectively, and thinking critically. The program prepares students for diverse careers in advertising, business, communications media, public relations, law, government service, and teaching.

Degree Options at Hartnell:

Associate of Science in Geology for Transfer Degree (AS-T)

Overview

The Associate in Science degree in Geology for Transfer provides a clearly articulated curricular track for students who wish to transfer to baccalaureate geology degree programs at a California State University (CSU) campus. This degree provides the lower division geology major courses required at many CSUs while exposing students to the core principles and practices of the geology field. Students completing the Geology degree will have an introductory foundation through the study of the scientific method, Earth materials, Earth processes, and Earth history. They will acquire skills, knowledge, and abilities that enable students to use a scientific approach incorporating basic chemistry, physics, and mathematics to the study of the Earth; identify common minerals, rocks, and geomorphic features of Earth; describe the materials and elucidate the processes that comprise the dynamic Earth system; describe the evidence for and occurrence of major events in Earth History. Most common career opportunities with a baccalaureate degree include: entry-level field technician/geologist in industry (mining, oil, environmental consulting) and governmental agencies (Department of Natural Resources, Geological Surveys, National Parks). This Associate in Science in Geology for Transfer (AS-T) Degree is intended to meet the lower division requirements for geology for all CSU campuses.

History, in the broad sense, is the study of all human experience. It examines people, institutions, ideas, and events through past and into the future. The study of history develops cultural literacy, critical thinking, and other skills while helping to understand today and plan for tomorrow. The discipline provides us with a better understanding of ourselves as individuals and as a society. In the study of history it is more important to learn the skills of finding, interpreting, and relating historical information than it is to simply memorize historical data. Through the study of history, a student can acquire the techniques of gathering and applying information to gain a perspective on the human condition. Fields for which BA graduates in history are qualified are law, journalism, writing, the foreign service, consulting, teaching, archiving, researching, and museum curating.

Kinesiology focuses on the anatomy, physiology, biochemistry, and biophysics of human movement, and applications to exercise and therapeutic rehabilitation. Includes instruction in biomechanics, motor behavior, motor development and coordination, motor neurophysiology, performance research, rehabilitative therapies, the development of diagnostic and rehabilitative methods and equipment, and related analytical methods and procedures in applied exercise and therapeutic rehabilitation.¹

The Associate in Arts in Kinesiology for Transfer Degree provides formalized educational opportunities for the development and acquisition of motor skills, improved physical fitness and their application to sports and physical activities. The curriculum covers a broad knowledge base that serves the diverse needs of students who wish to obtain an in-depth understanding of the field while providing a clear pathway to students who wish to transfer to a CSU campus. Baccalaureate programs may include, but are not limited to, exercise science, health promotion, physical education, therapeutic exercise & rehabilitation, and exercise & movement science.

The Associate in Science in Mathematics for Transfer offers course work in all levels of mathematics from arithmetic through differential equations and linear algebra. Students seeking improvement in their basic mathematical skills and those desiring development of advanced mathematical methods can all find meaningful activities in the Associate in Science in Mathematics for Transfer. While there are job opportunities in pure mathematics, there are even more in applied mathematics, statistics, engineering, and other technical fields relying heavily on mathematics. Positions for which four-year graduates in mathematics are qualified can be found in the fields of business, computers, teaching, and research.

The Music Program offers coursework and ensembles that embrace the diversity of our valley. Music is the universal language of the global village of the 21st century. It forms an integral part of our lives, from the musical “logos” that introduce every media program, to the songs and dances that provide identity to our diverse backgrounds. Study and participation in music has proven to further not only creativity and critical thinking, but also our sense of cooperation and community. At Hartnell, performance opportunities are available for all students in a wide range of vocal and instrumental ensembles. In addition, many courses are designed for students with no previous training in music. The department offers courses that prepare music majors for transfer to four-year universities as well as many courses for the general student.

**Degree Options at Hartnell:**

- Associate in Arts in Music for Transfer Degree (AA-T)
- Associate of Arts Degree in Music

**Related Careers**

- Teacher
- Private Studio Instructor
- Vocal or Instrumental Performer
- Composer
- Sound Engineer
- Conductor
- Arts and Education Administrator
- Music Journalist
- Music Director
- Concert Hall Manager

**Related Skills**

- Ability to work well under pressure
- Coordinating with others
- Creativity and performance
- Dedication and self-discipline
- Developing ideas
- Following written and oral instruction
- Good presentation skills
- Physical stamina
- Sense of rhythm
- Strong organizational and memory skills
- Visualizing concepts
Nurses are leaders in health care and work collaboratively with allied health care providers. There continues to be a large demand for registered nurses, and a career in nursing offers great flexibility regarding hours, work settings, and patient populations. Three out of five nurses work in hospitals and many nurses work part-time. The field of nursing combines science and technology with the desire to help people. One must enjoy helping people of all types and backgrounds. Nursing requires both physical stamina and emotional stability. Nurses must be able to both follow orders and direct others.¹

The Hartnell College Registered Nursing (RN) Program is a defined group of prerequisite, and corequisite courses and a 4-semester course of study consisting of classroom, high-fidelity simulation, nursing skills laboratory, seminar, and clinical experiences. Upon successful completion of program requirements, graduates are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). After passing, graduates may practice as registered nurses in a variety of acute and community-based settings. The Hartnell College RN Program is fully approved by the California Board of Registered Nursing (BRN) and is seeking accreditation by the Accreditation Commission for Education in Nursing.

Licensed Vocational Nurses (LVNs) provide basic medical care and work under the direction of registered nurses and doctors. LVNs typically do the following: monitor patient’s health, administer basic patient care, provide for basic comfort of patients, discuss care practices with patients, report patient status/concerns to RNs and doctors, and keep records on patients’ health. The Hartnell College Vocational Nursing (VN) Program is a defined group of prerequisite and corequisite courses in a 12-month certificate program of study consisting of classroom, high-fidelity simulation, nursing skills laboratory, and clinical experiences. Licensed vocational nurses perform essential nursing services under the supervision of a registered nurse or physician. Upon successful completion of program requirements, graduates are eligible to take the National Council Licensure Examination for Practical Nurses (NCLEX-PN). After passing, graduates may practice as vocational nurses in a variety of settings, including but not limited to community agencies, medical offices, hospitals, and long-term care facilities. The Hartnell College VN Program is fully approved by the California Board of Vocational Nurses and Psychiatric Technicians (BVN/PT) and is seeking accreditation by the Accreditation Commission for Education in Nursing.

Photography is an omnipresent, integral part of life in the 21st Century. It is the basis of visual media such as film making, video and digital imaging. The study of photography involves both the development of a technical, skill based knowledge, as well as an appreciation for how the medium has changed and continues to shape the values, the cultures and the lives of everyone globally. Photography is more than a means to make a visual record; it has also become a tool of change; a form of art; a means of learning, and platform for communicating ideas. The photography faculty are committed to empowering students with the ability to apply photo imaging to their lives for practical, professional and artistic purpose. Hartnell photo instruction prepares students for advancement to college and university study, to achieve personal enrichment and development, to acquire abilities needed to produce photographic art of high aesthetic value, and to develop or hone professional skills.

Physics is the natural science involving a general analysis of nature, conducted in order to understand how the universe behaves. It involves the study of matter and its motion through space and time, along with related concepts such as energy and force. Physics overlaps with many interdisciplinary areas such as astronomy, biology, chemistry, and geology. Physics also makes significant contributions through advances in new technologies that arise from theoretical breakthroughs. Research in physics includes the following specialty areas: condensed matter physics; solid-state physics; atomic, molecular, and optical physics; particle physics; astrophysics; geophysics and biophysics. Some positions for which four-year graduates in physics are qualified are in research, teaching, engineering, medicine, and industry.

The Associate in Arts in Political Science for Transfer allows students to focus their major course work and required electives in a social science concerned with the description and analysis of political, and especially governmental, institutions and processes. Increasingly, the emphasis is placed on how governments deal with specific policy problems such as war and peace, poverty, crime, education, energy, pollution, or inter-group relations, and on the factors that affect these problems. The study of political science provides one with the concepts, theories and methods necessary to analyze these problems scientifically. Fields for which BA graduates in political science are qualified are government work in the legislative or executive branches, the legal field as an attorney or paralegal, the military as an officer, a professional sales representative, or marketing professional.

The program in Social Sciences represents an interdisciplinary group of studies encompassing the disciplines of anthropology, geography, sociology and history. It is designed as a general preparation for a career in social programs that include education, human resources, law, and forensics. The program is based on the belief that it is important for an individual who plans to work with or for people cross-culturally (anthropologically), over a prescribed region or regions (geographically), within a social context (sociologically), and across time (historically). Upon successful completion of the Social Sciences program, a student should be able to: evaluate the nature of complex social phenomenon as it relates to contemporary U.S. politics, international relations, and diverse cultures, both past and present; self-reflect by assessing the complexity of human behavior at individual and group levels and comprehend how individuals can affect policy and in turn how policy affects individuals; and appraise the processes of evolution and social dynamics by which individuals and social structures have evolved.
Sociology is the scientific study of human behavior in society. It uses a variety of research and theoretical perspectives to analyze and explain human social behavior and social change. Sociology students examine a wide range of human interactions including marriage and family units, crime and deviance, culture and social change, group processes and interactions having to do with class, race and gender; diversity and globalization, social stratification and mobility and social movements. Program courses will help develop the student’s ability to examine the broader connections between personal life, public issues and social structure. Sociology provides a valuable major for a diverse range of career paths including teaching, social work, probation officer, employment counseling, urban planning and others.

Welding Technology

Overview

Welding Technology prepares individuals to apply technical knowledge and skills to join or cut metal surfaces. Includes instruction in arc welding, resistance welding, brazing and soldering, cutting, high-energy beam welding and cutting, solid state welding, ferrous and non-ferrous materials, oxidation-reduction reactions, welding metallurgy, welding processes and heat treating, structural design, safety, and applicable codes and standards.¹

The Welding Technology program provides students with entry- and advanced-level employment skills in welding and metalworking techniques that are relevant to the needs of local employers and industries. The program provides training in a variety of welding methods including SMAW, GTAW, GMAW and FCAW. Advanced level courses in plate and pipe welding prepare students for AWS welding certification testing. The program offers courses in Sheet Metal Fabrication and Welding Fabrication that focus on print reading and metalworking skills. In addition courses are offered in Architectural/Ornamental Ironwork fabrication and Toolmaking and Hard facing techniques that are used in the construction and agriculture industries.

Degree Options at Hartnell:
