Goal 6A: Hartnell College is committed to strengthening and furthering its current partnerships and to establishing new partnerships, in order to secure lasting, mutually beneficial relationships between the college and the community that the college serves.

Plan:

1. Continue to invite partnership representatives for each outcome under Goal 6A to present at Advancement Council. The outcomes under Goal 6A encompass multiple disciplines and areas of the college. It has proven extremely beneficial to focus an agenda on one of the outcomes, invite the experts to speak about their areas, and learn from the resulting discussion between council members and the presenters. This approach has not only contributed to “real” understanding of the outcomes, it has also resulted in suggestions for additional partnerships to consider adding as the outcomes develop.

2. Continue to refine a system for collecting evidence for the reported outcomes within Advancement and Development.

3. Document more detail for each outcome and work with IPE to make it available as part of the scorecard.

4. Propose to change KPI 6A.4a from “Number of articulation agreements” to “Number of strong articulation and transfer pathways related to Hartnell students’ top destination universities and top majors”.
**Goal 6A**: Hartnell College is committed to strengthening and furthering its current partnerships and to establishing new partnerships, in order to secure lasting, mutually beneficial relationships between the college and the community that the college serves.

**Progress:**

The College continues to work in partnership with industry, education and philanthropy to support the completion of the strategic plan. This is evidenced by the quality and quantity of partnerships reported in this progress report. We appreciate our partners and look forward to continued success in the multiple partnerships described in the following outcomes and KPI’s.
