Agriculture, Business & Industries Meta-Major

Programs in this Meta-Major:

- Administration of Justice
- Advanced Automotive Technology
- Advanced Diesel Technology
- Agriculture
- Agriculture Business
- Agriculture Plant Science
- Agriculture (Food Safety, Production)
- Business Administration
- Business Office Technology (Bookkeeping, Business Information Worker & Information Processing)
- Construction Management & Architecture
- Manufacturing Technology
- Web & Mobile Development
- Welding.

Why Agriculture, Business & Industries

If you are looking for Career Technical Education (CTE) that offers state-of-the-art, cutting-edge technologies, taught by industry-leading instructors, with practical business and real-world programs in a dynamic environment that emphasizes YOUR learning style, then Hartnell College CTE is where you need to be!
Administration of Justice

Overview

The Administration of Justice program includes the theory and practice of law enforcement, correctional science and paralegal/legal assistantship. Law enforcement courses focus on police activities including effective patrol services to the public. Correctional science courses instruct on the incarceration process as well as rehabilitation of the offender. Paralegal/legal assistantship courses overview the preparation of cases for court under the supervision of an attorney. Students will be exposed to the core principles and practices in the field of Administration of Justice. This includes a strong foundation in the theory and practice of law enforcement and law enforcement investigation, the origin and application of criminal law, the various components of the criminal justice system, the structure of the various court systems, and trial process.

Courses in these areas provide students with skills valuable to businesses in the Central Coast’s produce industry or with one of the many companies providing support services and products. Many of the courses are fully transferable to the California State University system. Internships and work experience are an important part of the program, providing students with experience and contacts in the local produce industry. Many local employees started their career paths in the agriculture program at Hartnell College. The hands-on, practical approach helps students to find opportunities in a wide range of industry positions.

Degree Options at Hartnell:

Manufacturing Technology

Overview

The Manufacturing Technology program is designed to prepare the student for an entry level position in the workforce and to provide continuing education. It focuses on fabrication of products based on industrial blueprints and/or product specifications in industrial technology. The program will provide students with a broad range of skills including industrial safety, fabrication, hydraulics and pneumatics, industrial electricity, basic machining, and blueprint reading. Students completing the program will have the manufacturing skills to solve technical challenges and work in the production trades. The Associate of Science in Manufacturing Technology is a Career Technical Education degree with the goal of preparing students for entry level positions in the manufacturing workforce. These opportunities include the fields of manufacturing, fabrication, and maintenance, and some examples of available careers are Industrial Technicians, Machine Tool Operators, and Machine Tool Programmers. In the college’s region there is currently a significant gap between the annual demand for a manufacturing workforce and the annual supply.

The Digital Web and Mobile Development program is designed for students who are interested in entering the fast-paced fields of web development and mobile app development. A student will learn the latest in web languages, basic web and mobile programming and appropriate use of digital media by building a digital portfolio of their work. Students can focus on either web development or mobile app development through the certificate program or combine the two disciplines for an Associate’s degree. Many of these courses are offered in the online environment to accommodate those students who are presently employed. The web and mobile degree option emphasizes the following competencies: managing the development of a project, delivery of comprehensive, integrated digital media via the web or mobile application. Students will also develop a set of customer liaison skills as they integrating all facets of digital media into an effective web or mobile application. As a result of ongoing changes in technology, the need to expand competencies, and changing transfer requirements, certificate and degree requirements may also change.

Related Skills

Arts & Languages form the basis of society, connecting us to one another. Whether it is advocating for others, writing creatively, exploring a foreign language, learning to give an effective public speech, mastering the nuances of photography, composing music or acting for the stage or screen, this Meta-Major prepares you for careers in education, performing and studio arts, film or language communication. Pursuing a career within Arts & Languages will teach you how to positively impact the world around you.

Programs in this Meta-Major:

- Communication Studies
- Digital Arts
- English
- English as a Second Language
- Film, Television, and Electronic Media
- Music
- Photography
- Spanish
- Studio Arts
- Theatre Arts & Cinema
- Liberal Arts Emphasis- Humanities
- Liberal Arts Emphasis- Languages & Literature
- General Studies Emphasis- Humanities
- General Studies Emphasis- Language & Rationality.
Communication Studies

Overview

Communication Studies allows students to focus their major course work and required electives to meet the needs of business, interpersonal, and public communication; and to demonstrate communicative competence. A degree in Communication Studies can lead to a career (or further study) in public relations, teaching, consulting, broadcasting, law ministry, public administration or any field in which communication skills are highly valued. Upon successful completion of the major a student should be able to: conceive, develop and deliver a focused, cogent, and clear presentation; explain the transactional and transformative nature of human communication; and research, organize and write a paper concerning the development, implementation, and effective use of various communication theories.

The study of English as a major discipline is composed of two different areas of concentration: literature and composition and writing. Literature explores the fiction, drama, and poetry of different cultures. It involves criticism of the literature being studied. Composition and writing deals with the mechanics of language, the structure of compositions, grammar, rhetoric (theory behind the composition), and creative writing. Courses in these areas deal not only with subjects but how to teach them.¹ The Associate in Arts in English for Transfer offers a study of composition, language, and literature designed to develop skills in reading perceptively, writing effectively, and thinking critically. The program prepares students for diverse careers in advertising, business, communications media, public relations, law, government service, and teaching.

The Basic English Certificate of Competency is awarded with successful completion of ESL 610, 615, 620, and 625. This noncredit program is intended for non-native speakers of English, with the focus on vocabulary, listening, pronunciation, and basic writing tasks. Students will learn and practice communication skills for everyday situations—home, work, school, and the community. Students should be able to read and write in their first language in order to participate successfully.

Program Goal

Completion of this program will prepare students for low intermediate level credit/academic ESL courses.
The Associate in Science degree in Film, Television, and Electronic Media provides a clearly articulated curricular track for students who wish to transfer to baccalaureate Film, Television, and Electronic Media (FTVE) degree programs at a California State University (CSU) campus. This degree provides the lower division FTVE major courses required at many CSUs while exposing students to the core principles of the field. For detailed requirements for individual four-year institutions, students should contact the transfer institution and meet with a counselor for specific transfer course requirements in their major. Courses are designed for the general education student and for those who may pursue FTVE as a major or as a career. Career options include camera operator, production technician, documentary film maker, video producer, radio DJ, radio technician, production assistant, video editor, actor, teacher, or commercial production technician. Careers with a technical emphasis include media.

The Music Program offers coursework and ensembles that embrace the diversity of our valley. Music is the universal language of the global village of the 21st century. It forms an integral part of our lives, from the musical “logos” that introduce every media program, to the songs and dances that provide identity to our diverse backgrounds. Study and participation in music has proven to further not only creativity and critical thinking, but also our sense of cooperation and community. At Hartnell, performance opportunities are available for all students in a wide range of vocal and instrumental ensembles. In addition, many courses are designed for students with no previous training in music. The department offers courses that prepare music majors for transfer to four-year universities as well as many courses for the general student.

Photography is an omnipresent, integral part of life in the 21st Century. It is the basis of visual media such as film making, video and digital imaging. The study of photography involves both the development of a technical, skill based knowledge, as well as an appreciation for how the medium has changed and continues to shape the values, the cultures and the lives of everyone globally. Photography is more than a means to make a visual record; it has also become a tool of change; a form of art; a means of learning, and platform for communicating ideas. The photography faculty are committed to empowering students with the ability to apply photo imaging to their lives for practical, professional and artistic purpose. Hartnell photo instruction prepares students for advancement to college and university study, to achieve personal enrichment and development, to acquire abilities needed to produce photographic art of high aesthetic value, and to develop or hone professional skills.

Why Health Sciences

By enrolling in a Health Sciences program, you can make a difference in others’ health and well-being while promoting diversity, equity and accessibility across the lifespan. At Hartnell, careers are available to you in the health sciences related to emergency medical technology, kinesiology, nursing, public health and respiratory therapy. Graduates work in acute care and other environments based within communities or work independently to make a difference in others’ health and wellness.
Kinesiology focuses on the anatomy, physiology, biochemistry, and biophysics of human movement, and applications to exercise and therapeutic rehabilitation. Includes instruction in biomechanics, motor behavior, motor development and coordination, motor neurophysiology, performance research, rehabilitative therapies, the development of diagnostic and rehabilitative methods and equipment, and related analytical methods and procedures in applied exercise and therapeutic rehabilitation.

The Associate in Arts in Kinesiology for Transfer Degree provides formalized educational opportunities for the development and acquisition of motor skills, improved physical fitness and their application to sports and physical activities. The curriculum covers a broad knowledge base that serves the diverse needs of students who wish to obtain an in-depth understanding of the field while providing a clear pathway to students who wish to transfer to a CSU campus. Baccalaureate programs may include, but are not limited to, exercise science, health promotion, physical education, therapeutic exercise & rehabilitation, and exercise & movement science.

Nurses are leaders in health care and work collaboratively with allied health care providers. There continues to be a large demand for registered nurses, and a career in nursing offers great flexibility regarding hours, work settings, and patient populations. Three out of five nurses work in hospitals and many nurses work part-time. The field of nursing combines science and technology with the desire to help people. One must enjoy helping people of all types and backgrounds. Nursing requires both physical stamina and emotional stability. Nurses must be able to both follow orders and direct others.¹

The Hartnell College Registered Nursing (RN) Program is a defined group of prerequisite, and corequisite courses and a 4-semester course of study consisting of classroom, high-fidelity simulation, nursing skills laboratory, seminar, and clinical experiences. Upon successful completion of program requirements, graduates are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). After passing, graduates may practice as registered nurses in a variety of acute and community-based settings. The Hartnell College RN Program is fully approved by the California Board of Registered Nursing (BRN) and is seeking accreditation by the Accreditation Commission for Education in Nursing.

The respiratory care program prepares individuals to assist in developing respiratory care plans, administer respiratory care procedures, supervise personnel and equipment operation, maintain records, and consult with other health care team members. Includes instruction in the applied basic biomedical sciences; anatomy, physiology, and pathology of the respiratory system; clinical medicine; therapeutic procedures; clinical expressions; data collection and record-keeping; patient communication; equipment operation and maintenance; personnel supervision; and procedures for special population groups. The Hartnell College Respiratory Care Practitioner (RCP) program is a defined group of prerequisite and corequisite courses, and a four-semester course of study consisting of classroom, high-fidelity simulation, skills laboratory, seminar, and clinical experiences. Clinical experiences are obtained in Monterey, Santa Clara, Santa Cruz, and San Luis Obispo counties. Upon successful completion of program requirements, graduates are eligible to take the National Board of Respiratory Care’s Registry Examination (RRT, CRT, CSE). After passing, graduates may practice as respiratory care practitioners in a variety of acute and community-based settings. The Hartnell College RCP program holds provisional accreditation from the Commission on Accreditation for Respiratory Care.

Licensed Vocational Nurses (LVNs) provide basic medical care and work under the direction of registered nurses and doctors. LVNs typically do the following: monitor patient’s health, administer basic patient care, provide for basic comfort of patients, discuss care practices with patients, report patient status/concerns to RNs and doctors, and keep records on patients’ health. The Hartnell College Vocational Nursing (VN) Program is a defined group of prerequisite and corequisite courses in a 12-month certificate program of study consisting of classroom, high-fidelity simulation, nursing skills laboratory, and clinical experiences. Licensed vocational nurses perform essential nursing services under the supervision of a registered nurse or physician. Upon successful completion of program requirements, graduates are eligible to take the National Council Licensure Examination for Practical Nurses (NCLEX-PN). After passing, graduates may practice as vocational nurses in a variety of settings, including but not limited to community agencies, medical offices, hospitals, and long-term care facilities. The Hartnell College VN Program is fully approved by the California Board of Vocational Nurses and Psychiatric Technicians (BVN/PT) and is seeking accreditation by the Accreditation Commission for Education in Nursing.

Degree Options at Hartnell:
- Associate of Science in Vocational Nursing
- Certificate of Achievement in Vocational Nursing

Addiction Studies

Overview

The Hartnell College Associate Degree in Addiction Studies provides students with the academic preparation needed for employment in the substance abuse field. The curriculum is designed to meet the California Association of Alcoholism and Drug Abuse Counselors (CAADAC) requirements and pending legislative regulations requiring 350 hours of approved alcohol and drug classroom education, 45 hours of supervised practicum and 255 hours of supervised work experience.

Students who wish to continue their course of study to a 4-year setting are recommended to complete the Associate of Arts Degree program, which includes both the general education requirements and major courses in Addiction Studies. Completion of additional requirements for transfer may be required. It is recommended that students take AOD courses in numeric order.

Chicanx Studies

Overview

The Chicanx Studies Program provides organized studies in the heritage of Chicanx culture and community to foster and expand a general understanding of this group. The Chicanx degree courses give students the opportunity to develop competence in an understanding of the language, history, and culture as well as current issues affecting the community. Completion of the Chicanx major enhances students’ employment opportunities and careers in schools, community groups, governmental agencies, and the private sector.

Degree Options at Hartnell:

This degree provides the lower division economics major courses required at many CSUs while exposing students to the core principles of the economics field. Economics is the study of how people choose to use scarce resources to produce goods and services and how they make allocation decisions to satisfy their wants and needs. In pursuing the Associate in Arts in Economics for Transfer degree, students acquire skills to analyze problems and then to use sound reasoning to make decisions. Students majoring in economics develop critical thinking, problem solving, and communication skills. As economic majors, students have learning opportunities that are relevant to many types of careers, including economists, public policy, government agencies and government related organizations (for example, the Federal Reserve System and the Bureau of Labor Statistics), business, finance, data analysis, accounting and education. For detailed requirements for individual four-year institutions, students should contact the transfer institution and meet with a counselor for specific transfer course requirements in their major.

History, in the broad sense, is the study of all human experience. It examines people, institutions, ideas, and events through past and into the future. The study of history develops cultural literacy, critical thinking, and other skills while helping to understand today and plan for tomorrow. The discipline provides us with a better understanding of ourselves as individuals and as a society. In the study of history it is more important to learn the skills of finding, interpreting, and relating historical information than it is to simply memorize historical data. Through the study of history, a student can acquire the techniques of gathering and applying information to gain a perspective on the human condition. Fields for which BA graduates in history are qualified are law, journalism, writing, the foreign service, consulting, teaching, archiving, researching, and museum curating.

Degree Options at Hartnell:

Associate in Arts in History for Transfer Degree (AA-T)

Overview

The Associate in Arts degree in Law, Public Policy and Society prepares students for law school upon completion of a bachelor’s degree. The interdisciplinary approach emphasizes the development of communication skills, introduces students to the legal field, and prepares students for further study in a variety of majors. Students who opt to pursue this course of study are encouraged to engage in further exploration of one or more specific majors as they select electives for degree completion.

The Associate in Arts degree in Law, Public Policy and Society for Transfer provides a clearly articulated curricular track for students who wish to transfer to baccalaureate degree programs at a California State University (CSU) campus in a variety of areas. For detailed requirements for individual four-year institutions, students should contact the transfer institution and meet with a counselor for specific transfer course requirements for their major.

STEM Meta-Major

Programs in this Meta-Major:

- Astronomy
- Biology
- Chemistry
- Computer Science
- Engineering
- Engineering Fundamentals
- Geology
- Mathematics
- Physics
- General Studies Emphasis- Natural Sciences.

Why STEM

Science, technology, engineering and math are omnipresent, and with increasing impact on building self-efficacy and contributing to the common good. In STEM, you turn problems into solutions, imagination into innovation and dreams into achievement. Your degree in STEM opens real opportunities for social, economic, intellectual and creative growth. Welcome to your STEM community!
The Astronomy program introduces students to physical properties and processes that govern celestial bodies in the Universe. Students may take astronomy courses to satisfy their natural sciences requirements or to transfer with a major in astronomy or double major in astronomy and physics to the university.

Students who pursue a B.S. degree in astronomy will be qualified to enter a teaching credential program, operate a planetarium, and assist at an observatory. With an M.S. degree, students can teach astronomy or physics at a community college, be a telescope operator at a major observatory, or work in industry. A Ph.D. qualifies students for a career in research at a university, space agency, or observatory.

Degree Options at Hartnell:
- Associate of Science Degree in Astronomy

Related Careers
- Astronomer
- Natural Science Manager
- Science Teacher
- Observatory Director
- Research Scientist
- Astronomy/Physics Professor
- Astrophysicist

A program of study that focuses on the scientific study of the composition and behavior of matter, including its micro and macro structure, the processes of chemical change, and the theoretical description and laboratory simulation of these phenomena.¹ A full program of chemistry for the professional scientist is offered through general chemistry and a two-semester course in organic chemistry. A separate track is offered for nursing students which includes general inorganic, organic and biochemistry. The Chemistry discipline also has a strong commitment to the student with no prior chemistry or one whose background is weak. The entire program is taught with a strong emphasis on the laboratory and in the more advanced classes, students receive hands-on experience with a wide variety of instruments.

The Computer Science and Information Systems program prepares students taking the Computer Science Option with the lower-division coursework required at most universities for advancement to upper-division coursework for the Bachelor’s Degree with a major in Computer Science or Information Systems fields. All options are designed to provide students with the skills necessary for employment in the information systems and computer science industry. This certificate or degree program is designed for those interested in becoming programmers in a technical, scientific systems or game development environment, or for students desiring transfer to a four-year Computer Science Degree Program.

Degree Options at Hartnell:

Associate of Science for Transfer Degree in Computer Science (AS-T)

Overview

Related Careers

- Computer & Information System Managers
- Information Security Analysts
- Software Developers
- Software Quality Assurance Engineers & Testers
- Computer Science Teacher
- Computer Programmer
- Computer Network Support Specialist
- Computer Systems Engineer
- Web Administrator
- Web Developer
- Search Marketing Strategist
- Systems Analyst

Related Skills

- Ability to think logically, thoroughly and concentrate intensely
- Detail oriented, organized, work well under pressure
- Problem solving and decision-making
- Analytical reasoning
- Ability to master new computer languages and methodologies
- Sensitive to multiple perspectives
- Curiosity and enthusiasm
- Advanced quantitative abilities
- Classifying/Systemizing
- Research
- Statistical analysis
- Written and oral communication
Degree Options at Hartnell:

Associate of Science Degree in Engineering

Overview

Engineering is the practical application of math and science to solve problems. Engineers are problem-solvers who make things work faster, cheaper, and more efficiently. Technologies developed by engineers improve the ways that we live, communicate, work, travel, stay healthy, and entertain ourselves. From computer chips to cellphones and buildings to automobiles, engineering makes every aspect of our modern life possible. Hartnell College offers a two-year lower division engineering program that prepares students for transfer in all engineering disciplines to colleges and universities in California and across the United States. The first two years of the engineering curriculum at most colleges and universities have a shared core of mathematics and physics, with specialization in several areas. As there are different disciplines within engineering, the Engineering Faculty Discipline Review Group (FDRG) has developed four different model curricula and each one feeds into one or more majors at the baccalaureate level. The four discipline clusters are: 1. Mechanical, Aerospace, and Manufacturing Engineering 2. Civil Engineering 3. Electrical Engineering 4. Computer and Software Engineering The required core curriculum follows the Engineering Articulation Agreement developed by the Engineering Liaison Council (ELC) between community colleges and four-year public and private colleges and universities.

Degree Options at Hartnell:

Certificate of Achievement in Engineering

Overview

A student completing the Engineering Fundamentals Certificate of Achievement will gain a solid grounding in the basic principles that underlie all engineering disciplines. This certificate provides both academic preparation for and a pathway to internships. When combined with further study, it will lead to the Engineering Associate in Science Degree and/or transfer. This certificate is intended to be completed at the beginning of a student’s course of study, while they are at the freshman level. As such, it prepares a student to enter most sophomore-level engineering and STEM support courses. This certificate is specifically designed to encourage and guide students to select their courses in a sequence which enables them to transfer as fast as possible. Recommendations based on majors are as follows:

- Civil or Mechanical engineering majors: Engineering 5 AND Chemistry 1A
- Computer or Software engineering majors: Computer Science 1 AND Computer Science 2A
- Electrical engineering majors: Computer Science 1 AND (Computer Science 2A OR Chemistry 1A)

Students should discuss which options make sense for them with their counselor.

General Studies Emphasis in Natural Sciences

Overview

The General Studies with an Area of Emphasis program, developed by the Counseling Discipline, is designed to meet the needs of students interested in graduating with an Associate level college degree by studying specific related disciplines of academic subjects (Natural Sciences).

Courses in natural sciences are those that examine the physical universe, its life forms, and its natural phenomena. Students will develop an appreciation and understand of the scientific method and an understanding of the relationships between science and other human activities.

Degree Options at Hartnell:

Associate in Arts in General Studies with an Area of Emphasis in Natural Sciences

Related Careers

• Administrative or Executive Assistant
• Customer Service Representative
• General Manager
• Nonprofit Program Manager

Related Skills

• Analysis
• Communication
• Cultural literacy and foreign language proficiency
• Emotional intelligence
• Leadership
• Managing qualitative information
• Planning and organizing
• Research
• Systemic thinking
• Learning and synthesizing new ideas
Overview

The Associate in Science degree in Geology for Transfer provides a clearly articulated curricular track for students who wish to transfer to baccalaureate geology degree programs at a California State University (CSU) campus. This degree provides the lower division geology major courses required at many CSUs while exposing students to the core principles and practices of the geology field. Students completing the Geology degree will have an introductory foundation through the study of the scientific method, Earth materials, Earth processes, and Earth history. They will acquire skills, knowledge, and abilities that enable students to use a scientific approach incorporating basic chemistry, physics, and mathematics to the study of the Earth; identify common minerals, rocks, and geomorphic features of Earth; describe the materials and elucidate the processes that comprise the dynamic Earth system; describe the evidence for and occurrence of major events in Earth History. Most common career opportunities with a baccalaureate degree include: entry-level field technician/geologist in industry (mining, oil, environmental consulting) and governmental agencies (Department of Natural Resources, Geological Surveys, National Parks). This Associate in Science in Geology for Transfer (AS-T) Degree is intended to meet the lower division requirements for geology for all CSU campuses.

- Develop research proposals
- Critical thinking and analysis
The Associate in Science in Mathematics for Transfer offers course work in all levels of mathematics from arithmetic through differential equations and linear algebra. Students seeking improvement in their basic mathematical skills and those desiring development of advanced mathematical methods can all find meaningful activities in the Associate in Science in Mathematics for Transfer. While there are job opportunities in pure mathematics, there are even more in applied mathematics, statistics, engineering, and other technical fields relying heavily on mathematics. Positions for which four-year graduates in mathematics are qualified can be found in the fields of business, computers, teaching, and research.

Physics is the natural science involving a general analysis of nature, conducted in order to understand how the universe behaves. It involves the study of matter and its motion through space and time, along with related concepts such as energy and force. Physics overlaps with many interdisciplinary areas such as astronomy, biology, chemistry, and geology. Physics also makes significant contributions through advances in new technologies that arise from theoretical breakthroughs. Research in physics includes the following specialty areas: condensed matter physics; solid-state physics; atomic, molecular, and optical physics; particle physics; astrophysics; geophysics and biophysics. Some positions for which four-year graduates in physics are qualified are in research, teaching, engineering, medicine, and industry.
